Pull Request #19 – Assignment 6 ML Ops Pipelines	https://github.com/ConestogaAIML/info8665-ai-receptionist/pull/19
A6 feature branch	https://github.com/ConestogaAIML/info8665-ai-receptionist/tree/feat/assignment6-mlops-pipelines
Dockerfile (repo evidence)	https://github.com/ConestogaAIML/info8665-ai-receptionist/blob/feat/assignment6-mlops-pipelines/Dockerfile
SOA Service Contracts (≥6/use case)	https://github.com/ConestogaAIML/info8665-ai-receptionist/blob/feat/assignment6-mlops-pipelines/docs/soa-service-contracts.md
Docker Hub image	preeja73/ai-receptionist:latest
Azure DevOps / Sprint-6 board	https://dev.azure.com/Panilal17960870/AI-Receptionist/_sprints/taskboard/AI-Receptionist%20Team/AI-Receptionist/Sprint-6
Instructor UAT work item #89	https://dev.azure.com/Panilal17960870/AI-Receptionist/_workitems/edit/89
Local UI / API docs / Streamlit	http://localhost:3000 · http://localhost:8000/docs · http://localhost:8501

1) Application running locally — AI Receptionist UI (localhost:3000)

Verified: AI Receptionist is running. Visit /docs for the API.. Screenshots below show the live Docker UI at 127.0.0.1:3000 (Chat + Appointments with AI Slot Advisor). API/Swagger localhost:8000/docs. Services bind 0.0.0.0 for remote-host visibility. Dockerfile packages Next.js + FastAPI + Streamlit + ML assets.

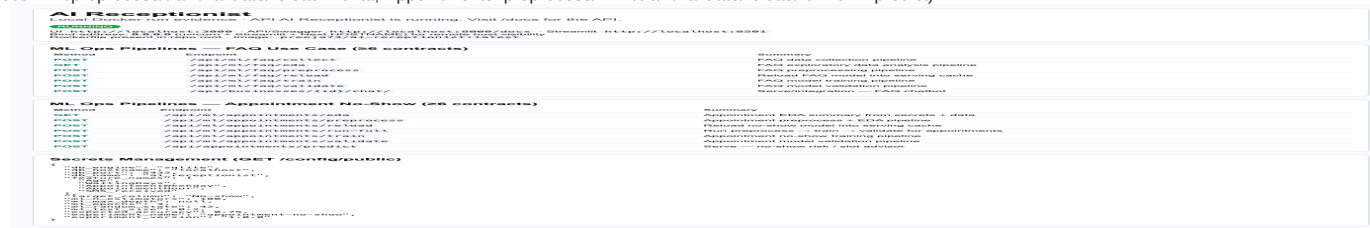

Chat UI — localhost:3000

Appointments + AI Slot Advisor — localhost:3000/appointments

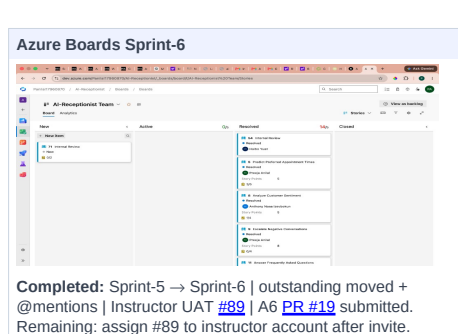

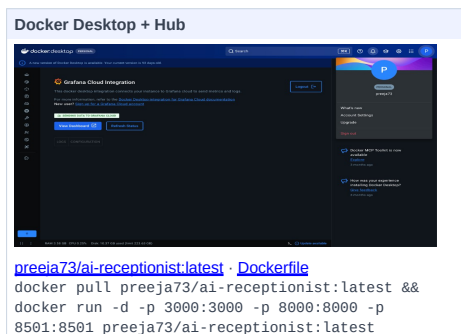

2) ML Pipelines + SOA (≥6 contracts per use case)

ML Pipelines: FAQ and Appointment No-Show implemented as authenticated API services. Each use case has ≥6 service contracts in [docs/soa-service-contracts.md](https://github.com/ConestogaAIML/info8665-ai-receptionist/blob/feat/assignment6-mlops-pipelines/docs/soa-service-contracts.md) (FAQ: collect/EDA/preprocess/train/validate/reload + chat; Appointments: preprocess/EDA/train/validate/reload/run-full + predict).

Live ML Ops endpoint evidence + /config/public secrets (from running container)

3) Docker Hub + Boards (completed) + instructor run

</config/public>
experiment=appointment-no-show v1.0.0
db=sqlite | bind=0.0.0.0
features=Age, WaitingDays, AppointmentWeekday...
